## Education Quality and

Accountability Office
EQAO

## Working together

## to improve student learning

The Education Quality and Accountability Office (EQAO) is dedicated to working with the education community and to enhancing the quality and accountability of the education system in Ontario. This is achieved through student assessments that produce objective, reliable and relevant information, and through the timely public release of this information along with recommendations for system improvement.

## Values

EQAO values giving all students the opportunity to reach their highest possible level of achievement and well-being.

EQAO values its role as a service to educators, parents, students, government and the public in support of teaching and learning in the classroom.

EQAO values credible evidence that informs professional practice and focuses attention on interventions that improve student success.

EQAO values research that informs large-scale assessment and classroom practice.

EQAO values the dedication and expertise of Ontario's educators and their involvement in all aspects of the assessment process and the positive difference their efforts make in student outcomes.

EQAO values the delivery of its programs and services in a manner that embraces diversity and moves beyond tolerance and celebration to inclusivity.

## EQAO's Provincial Elementary School Report

Results of the 2017-2018 Assessments of Reading, Writing and
Mathematics, Primary Division (Grades 1-3) and Junior Division (Grades 4-6)

## MESSAGE FROM THE CHAIR OF THE BOARD OF DIRECTORS

On behalf of the Board of Directors of the Education Quality and Accountability Office (EQAO), I am pleased to present Ontario Student Achievement: EQAO's Provincial Elementary School Report: Results of the 2017-2018 Assessments of Reading, Writing and Mathematics, Primary Division (Grades 1-3) and Junior Division (Grades 4-6).

It is important for Ontario to conduct province-wide assessments of students' literacy and math skills at key stages of their learning. Assessments of this kind contribute to accountability, equity and continuous improvement in the education system. They lead to important conversations about teaching philosophies, strategies and resources. The evolution of these discussions and the decisions they bring about can yield significant changes at the student, school, board and provincial levels. EQAO data offer important information that teachers and educators can use to identify where additional programs and supports may be needed to improve students' academic achievement. Education represents the second-largest expenditure in Ontario's budget, and it is appropriate that

Dave Cooke Chair, Board of Directors independent evaluations gauge the effectiveness of this investment.

The Assessments of Reading, Writing and Mathematics, Primary Division (Grades 1-3) and Junior Division (Grades 4-6) measure achievement in the areas of literacy and math across the curriculum, to help us understand achievement trends in elementary schools. The primary-division assessment offers important benchmark data that ground subsequent analyses of cohort trends. Likewise, the junior-division assessment offers insights into learning patterns during a child's development.

An independent agency of the Government of Ontario, EQAO provides data that bring attention to trends and topics in education that require further consideration. This year's assessment results in elementary schools show a continued decline in math achievement, which suggests the Ontario's Renewed Math Strategy is not having the intended impact. Reading results continue to improve, and while writing is stronger in Grade 6, there is a decline in this area among students in Grade 3.

EQAO data are just one source of information among several others that can help build a comprehensive understanding of student achievement in Ontario. Parents, teachers, administrators, researchers and policy-makers can use these data-along with information from classrooms, schools, boards and communities-to ask questions about our publicly funded education system and make adjustments that benefit students.

Dave Cooke
Chair, Board of Directors

## MESSAGE FROM THE CEO

On behalf of EQAO, it is my pleasure to present the provincial-level results of the 2017-2018 primaryand junior-division Assessments of Reading, Writing and Mathematics. EQAO is committed to supporting student success by releasing independent data that bring attention to trends in student achievement in Ontario.

Each year, EQAO releases its provincial data to give Ontarians a snapshot of student achievement in relation to expectations outlined in The Ontario Curriculum. These snapshots are enabled through the partnership of Ontario educators, whose support and expertise are critical to the development, administration and scoring of EQAO's large-scale assessments.

By assessing achievement at key stages of every student's education, Ontario gains insights into academic performance over time at the individual student, school, school board and provincial levels. EQAO data point to challenges students face in different subject areas but also to academic strengths over time.

Norah Marsh Chief Executive Officer

For instance, this year's results shed light on some positive trends in Ontario's education system. Three-quarters of students who took the assessment at the elementary level met the provincial reading standard in 2018, and achievement in reading has increased in both Grades 3 and 6 over the past five years.

There are also some trends that will be cause for reflection. EQAO data show that writing achievement in Grade 3 is lower than in Grade 6, and has been decreasing over the past five years. EQAO results from 2016 and 2018 suggest that the junior grades are particularly important to the refinement and maturation of writing skills. In numeracy, the percentage of students meeting the provincial math standard at the elementary level has also been decreasing since 2014, and for the first time in five years, fewer than half of the students who took the test in Grade 6 met the provincial math standard.

Responses to EQAO's Student Questionnaire suggest that a large number of Grades 3 and 6 students are motivated to do their best when they do activities in class. Despite high motivation, a smaller group of Grade 3 and Grade 6 students believe they are good in math. It is encouraging that motivation remains high, as this can help facilitate future academic improvement.

In helping to identify where support is required, EQAO data are an additional tool that can contribute to the development of inclusive improvement plans that will benefit each Ontario student and encourage each child's ongoing success.

Norah Marsh

[^17]Principal Questionnaire Results Over Time

|  | 2013-2014 | 2014-2015 | 2015-2016 | 2016-2017 | 2017-2018 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Elementary school principals who completed <br> the questionnaire | $\#=3137$ | EC | $\#=2338$ | $\#=2121$ | \# = 2564 |

USE OF EQAO DATA
Percentage of principals who indicated that they used EQAO data (demographic data, assessment and questionnaire results) this year to do the following:*

| To identify how well students are meeting curriculum <br> expectations | $87 \%$ | EC | $85 \%$ | $86 \%$ | $86 \%$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| To identify areas of strength and areas for improvement in <br> elementary programs | $96 \%$ | EC | $93 \%$ | $96 \%$ | $94 \%$ |
| To guide school improvement initiatives | $96 \%$ | EC | $93 \%$ | $95 \%$ | $96 \%$ |
| To identify what resources are needed and to support their <br> acquisition | $64 \%$ | EC | $60 \%$ | $61 \%$ | $60 \%$ |
| To support change in teaching practices | $84 \%$ | EC | $81 \%$ | $83 \%$ | $82 \%$ |
| To communicate with parents and guardians about student <br> achievement | $78 \%$ | EC | $71 \%$ | $73 \%$ | $70 \%$ |

## EXTENDED-LEARNING ACTIVITIES FOR STUDENTS

Percentage of principals who indicated that their school offered the following "to some extent" or "to a great extent" to students: ${ }^{\dagger}$

| Extended mathematics activities (e.g., mathematics club, <br> mathematics competition) | $46 \%$ | EC | $50 \%$ | $54 \%$ | $55 \%$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Extended science- and technology-related activities <br> (e.g., science fair) | $37 \%$ | EC | $49 \%$ | $50 \%$ | $55 \%$ |
| Extended reading activities (e.g., book club, school-wide <br> reading period) | $67 \%$ | EC | $66 \%$ | $61 \%$ | $63 \%$ |
| Extended writing activities (e.g., writing contest) | $39 \%$ | EC | $39 \%$ | $35 \%$ | $37 \%$ |
| Extended speaking activities (e.g., school radio, debate club, <br> play, poetry recital) | $50 \%$ | EC | $54 \%$ | $48 \%$ | $50 \%$ |
| Other extended learning activities (e.g., chess club, concert, <br> trivia challenge, guest speaker) | $80 \%$ | EC | $81 \%$ | $77 \%$ | $80 \%$ |

[^18]Principal Questionnaire Results Over Time (continued)

|  | 2013-2014 | 2014-2015 | 2015-2016 | 2016-2017 | 2017-2018 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Elementary school principals who completed the questionnaire | $\#=3137$ | EC | $\#=2338$ | $\#=2121$ | $\#=2564$ |
| COMMUNICATION WITH PARENTS AND GUARDIANS |  |  |  |  |  |
| Percentage of principals who indicated that their school was "successful" or "very successful" in accomplishing the following this year:* |  |  |  |  |  |
| Helping parents and guardians understand the link between EQAO assessments and The Ontario Curriculum | 19\% | EC | 18\% | 24\% | 24\% |
| Helping parents and guardians understand the link between EQAO results and the school improvement plan | 24\% | EC | 19\% | 27\% | 27\% |
| Being responsive to the needs of individual parents and guardians (e.g., flexible meeting times) | 73\% | EC | 73\% | 70\% | 72\% |
| Keeping parents and guardians informed about school activities | 84\% | EC | 85\% | 81\% | 83\% |

PARENTAL ENGAGEMENT IN SCHOOL ACTIVITIES
Percentage of principals who indicated that parents and guardians of the students at their school did the following "to some extent" or "to a great extent" this year: ${ }^{\dagger}$

| Participated in discussions about EQAO results and how they <br> relate to the school improvement plan | $26 \%$ | EC | $18 \%$ | $24 \%$ | $25 \%$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Participate in school activities for parents, guardians and <br> families | $68 \%$ | EC | $72 \%$ | $67 \%$ | $68 \%$ |
| Show support for teachers' efforts | $84 \%$ | EC | $83 \%$ | $79 \%$ | $80 \%$ |
| Volunteer in classroom activities | $71 \%$ | EC | $73 \%$ | $66 \%$ | $66 \%$ |
| Work collaboratively with teachers to ensure that students <br> met learning goals | $64 \%$ | EC | $67 \%$ | $61 \%$ | $62 \%$ |

## Summary of Findings

## Assessments of Reading, Writing and Mathematics, Primary and Junior Divisions

- Over the past five years, the percentage of Grade 3 students who achieved at or above the provincial reading standard has increased by five percentage points, from $70 \%$ to $75 \%$, but has decreased by six percentage points for the writing standard (from 78\% to 72\%) and the mathematics standard (from $67 \%$ to 61\%). Since 2016-2017, these percentages have increased by one point in reading and decreased by one point in writing and mathematics.
- Over the past five years, the percentage of Grade 6 students who achieved at or above the provincial standard has increased by three percentage points in reading, from 79\% to $82 \%$, and by two percentage points in writing, from $78 \%$ to $80 \%$. It has decreased in mathematics from $54 \%$ to 49\%, a five-percentage-point drop. Since 2016-2017, these percentages have increased by one point in reading and writing and decreased by one point in mathematics.

## Groups of Interest

- For the past five years, the gender gap in Grade 3 reading and writing has been in favour of female students: the difference has been between eight and 10 points in reading and between 11 and 13 points in writing. In mathematics, the percentages of female and male students at the provincial standard have been nearly even over this same time frame.
- Similarly, in Grade 6, the gender gap in reading and writing has been in favour of female students over the past five years: the difference has been between eight and 10 points in reading and between 13 and 17 points in writing. In contrast, the percentages of boys and girls at or above the provincial standard for mathematics have been relatively even over the past five years.
- For English language learners, the percentages of Grades 3 and 6 students meeting the provincial standard have each increased by three percentage points in reading since 2013-2014. By comparison, the percentages of Grade 3 students meeting the standard in writing and in mathematics have decreased by seven and eight percentage points respectively since 2013-2014. In Grade 6, the percentage of students meeting the standard has been relatively stable in writing; in mathematics, it has declined by eight percentage points since 2013-2014.
- Among students with special education needs, there have been observable gains in reading. In Grade 3, there has been a six-point increase in the percentage of students meeting the provincial standard in reading since 2013-2014. In contrast, there has been a six-point decline in writing and a four-point decline in mathematics in the percentages of students meeting the provincial standard over the same time period.
- Similarly, among students with special education needs in Grade 6, there has been a seven-point increase in the percentage of students at or above the provincial standard in reading since 2013-2014. Over the same time frame, there has been a four-point decline in writing and a twopoint decline in mathematics in the percentage of students meeting the provincial standard.

## Questionnaire Results

- Among Grade 3 students, larger percentages of female than male students indicated that they like to read (51\% vs. $41 \%$ ) and write ( $58 \%$ vs. $43 \%$ ), and that they feel they are good readers ( $65 \%$ vs. $62 \%$ ) and writers ( $55 \%$ vs. $43 \%)$. The reverse was observed in mathematics, where larger percentages of male than female students responded positively to the statements "I like mathematics" ( $63 \%$ vs. $53 \%$ ) and "I am good at mathematics" ( $63 \%$ vs. $49 \%$ ). In all three subjects, however, larger percentages of female students indicated "most of the time" to the statements related to doing their best in class.
- These same patterns held for students in Grade 6. Greater shares of female than male students responded "most of the time" to the statements "I like to read" ( $51 \%$ vs. $36 \%$ ), "I am a good reader" (71\% vs. 64\%), "I like to write" (54\% vs. $30 \%$ ) and "I am a good writer" (50\% vs. 34\%). Greater proportions of male than female students agreed with the statement "I like mathematics" (58\% vs. 42\%), "I am good at mathematics" ( $60 \%$ vs. $44 \%$ ) and "I am able to answer difficult mathematics questions" ( $47 \%$ vs. 29\%). For the past three years, however, the percentages of female and male students who indicated "most of the time" to the statement "I do my best when I do mathematics activities in class" were the same ( $78 \%$ this year).
- Students' motivation and confidence in their math ability have remained relatively stable over the past five years, as measured by the questionnaire.

## Explanation of Terms

## All Students

Results are reported for all students in the grade (Grade 3 or 6).

## Provincial Standard

The Ministry of Education, in The Ontario Curriculum, has set Level 3 as the provincial standard. Level 3 identifies a considerable level of achievement of provincial expectations. The levels of achievement are aligned with the four-level scale developed by the Ministry of Education and used on the Provincial Report Card.

## Level 4

The student has demonstrated the required knowledge and skills thoroughly or to a high degree. Achievement exceeds the provincial standard.

## Level 3

The student has demonstrated the required knowledge and skills to a considerable degree. Achievement meets the provincial standard.

## Level 2

The student has demonstrated the required knowledge and skills. Achievement approaches the provincial standard.

## Level 1

The student has demonstrated the required knowledge and skills in limited ways. Achievement falls much below the provincial standard.

## NE1

"Not Enough Evidence for Level 1" is used when students provided enough information to score but did not demonstrate enough evidence of knowledge and understanding to be assigned Level 1.

## No Data

This designates students who did not have a result due to absence or other reasons.

## Exempt

This designates students who were formally exempted by the school from participating in the assessment or in one or more components of it.

## English Language Learners

These are students who have been identified by the school in accordance with English Language Learners: ESL and ELD Programs and Services: Policies and Procedures for Ontario Elementary and Secondary Schools, Kindergarten to Grade 12 (2007).

## Students with Special Education Needs (Excluding Gifted)

These are students who have been formally identified by an Identification, Placement and Review Committee (IPRC), as well as students who have an Individual Education Plan (IEP). Students whose sole identified exceptionality is giftedness are not included.

## THE EQAO ASSESSMENT PROCESS

## About the Primary- and Junior-Division Assessments

EQAO conducts several province-wide tests, among them the Assessments of Reading, Writing and Mathematics, Primary and Junior Divisions. The primary- and junior-division assessments are conducted annually and involve all Grades 3 and 6 students in publicly funded schools in Ontario. The tests measure how well students have met the provincial expectations for the subjects assessed, as outlined in The Ontario Curriculum.

## Design and Development

All EQAO tests are developed in keeping with the Principles for Fair Student Assessment Practices for Education in Canada (1993), a document created by representatives of national education institutions and associations and widely endorsed by Canada's education community. EQAO consults with internationally recognized experts in large-scale assessment for all aspects of the tests: design, development, bias reviews, field testing, administration, scoring and reporting. Educators from across the province also work with EQAO on all aspects of the tests, including question development and review (i.e., for bias, curriculum connection and content), scoring-material development and scoring.

Parallel English- and French-language versions of the tests are developed. Each version has the same number and types of questions but reflects variations in the curricula for the two languages. The tests contain multiple-choice questions, openresponse questions and writing tasks through which students can demonstrate what they know and can do. Grades 3 and 6 students are assessed in three key subject areas:

Reading: using a variety of reading strategies and conventions, understanding concepts, making inferences and connecting ideas

Writing: using writing strategies and language conventions, understanding assigned tasks, organizing ideas and communicating with the reader

Mathematics: demonstrating knowledge and skills across the five strands of mathematics: number sense and numeration; measurement; geometry and spatial sense; patterning and algebra; and data management and probability

## Consistency and Fairness

Each year, schools are sent English- or French-language administration and accommodation guides. These guides provide instructions to ensure that consistent administrative and accommodation procedures are followed. The guides describe in detail what is expected of educators involved in the administration of the tests, including

- professional responsibilities for the administration of the tests;
- detailed steps to follow (e.g., preparation of materials for distribution to students, administration and return of materials to EQAO) and
- the accommodations, special provisions and exemptions allowed for students with special education needs and for English language learners.

## Quality Assurance

EQAO has established quality-assurance procedures to help ensure that its assessments are administered consistently and fairly across the province and that the data produced are valid and reliable. EQAO follows a number of procedures to ensure that parents, educators and the public have confidence in the validity and reliability of the results reported:

- Quality-assurance monitors: EQAO contracts quality-assurance monitors to visit a random sample of schools in order to observe the administration of the assessments to determine the extent to which EQAO guidelines are being followed.
- Examination of test materials: Following each assessment, EQAO looks for evidence of possible irregularities in administration. This is done through an examination of test materials from a random sample of schools prior to scoring.
- Follow-up on reports of irregularities: EQAO systematically follows up on any reports of irregularities received from principals, teachers, parents and others.
- Database analyses: EQAO conducts statistical analyses of student response data to identify student response patterns that suggest the possibility of collusion between two or more students.

## Scoring

EQAO scoring procedures are designed to ensure accurate, fair and reliable results for all students. Before scoring takes place, all student booklets are scrambled so that they can be distributed randomly to scorers. All student booklets go through "blind scoring," with no information on the student work that could identify a student. EQAO's scoring process includes scorer training, which requires successful completion of a qualifying test, and monitoring for validity and reliability. The validity and reliability of scoring is tracked daily at the scoring site, and retraining occurs if it is required. Students' responses to open-response mathematics questions, reading questions and writing prompts are scored by qualified Ontario educators.

Given the EQAO scoring process, parents and students can be assured that the results obtained are a reliable indication of the students' work and that the work has been scored against the same standard, which has been applied consistently for all students across the province and from year to year.

## Reporting

For the primary- and junior-division assessments, EQAO uses a four-level scale to report on student achievement. This scale is based on The Ontario Curriculum, which sets Level 3 as the provincial standard. Levels 1 and 2 indicate achievement below the provincial standard, while Level 4 indicates achievement above it.

The results of the tests yield individual, school and school-board data on student achievement. EQAO posts board and school results on its Web site for public access. As well, EQAO publishes an annual provincial report for education stakeholders and the general public.

Data from the tests provide valuable information to support improvement planning at the school, school-board and provincial levels.

## ABOUT THE EDUCATION QUALITY AND ACCOUNTABILITY OFFICE

EQAO's tests measure student achievement in reading, writing and mathematics in relation to Ontario Curriculum expectations. The resulting data provide accountability and a gauge of quality in Ontario's publicly funded education system. By providing this important evidence about learning, EQAO acts as a catalyst for increasing the success of Ontario students.

The objective and reliable results from EQAO's tests complement the information obtained from classroom and other assessments to provide students, parents, teachers and administrators with a clear and comprehensive picture of student achievement and a basis for targeted improvement planning at the individual, school, school board and provincial levels. EQAO helps build capacity for the appropriate use of data by providing resources that educators, parents, policy-makers and others in the education community can use to improve learning and teaching. EQAO distributes an individual report to each student who writes a test, and posts school, school board and provincial results on its Web site (www.eqao.com).

## Mandate

EQAO is dedicated to working with the education community and to enhancing the quality and accountability of the education system in Ontario. This is achieved through student assessments that produce objective, reliable and relevant information, and through the timely public release of this information along with recommendations for system improvement.

## Values

EQAO values giving all students the opportunity to reach their highest possible level of achievement and well-being.

EQAO values its role as a service to educators, parents, students, government and the public in support of teaching and learning in the classroom.

EQAO values credible evidence that informs professional practice and focuses attention on interventions that improve student success.

EQAO values research that informs large-scale assessment and classroom practice.

EQAO values the dedication and expertise of Ontario's educators and their involvement in all aspects of the assessment process and the positive difference their efforts make in student outcomes.

EQAO values the delivery of its programs and services in a manner that embraces diversity and moves beyond tolerance and celebration to inclusivity.
